

# HMO Donation Program in numbers

Our understanding of human milk oligosaccharides (HMOs) is evolving rapidly, as scientists seek to uncover their full potential in early life nutrition and beyond.

Established in 2011, dsm-firmenich's HMO Donation Program aims to expand the industry's body of research on HMOs' proposed health benefits, mode of action and potential applications. The program is open to all healthcare professionals, researchers and academics interested in the field of HMO research.

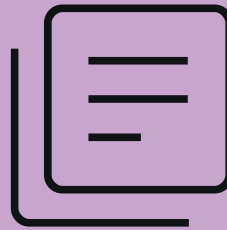

Read on to find out how DSM is supporting HMO research worldwide.

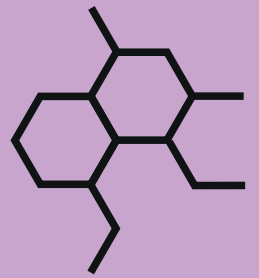

**100+**  
research projects

across  
**55**  
different  
research centers  
in 23 countries

resulting in  
**50+**  
publications

**20+**  
HMO structures  
and mixtures  
available for donation

In the last 5 years, research has been focused around 6 key topics:

Synbiotics

Gut-brain  
axis

Role in  
infection and  
pathogens

Immunity and  
anti-inflammatory  
effects

Healthy  
aging

HMO  
analysis
