

# Verax™ DBS Analytics

25-OH-D<sub>3</sub> blood analysis & interpretation made easy

Optimize the immunity, bone health, reproductive performance & efficiency of your animals by understanding & managing their vitamin D3 status.

Introducing Verax™ DBS Analytics which is an easy-to-use, fast and effective, on-farm service. This service delivers accurate insights relevant to your animals allowing more informed decision making for the best economical outcome for you and your herd.

Verax™ DBS Analytics puts actionable insights in your hands by making the invisible... visible

## How does it work?

Verax™ DBS Analytics offers users an easy-to-use, non-invasive way to assess the vitamin D<sub>3</sub> status of their animals together with interpretation of the results. Using dried blood spot (DBS) cards provided in a kit that can be ordered online, a couple of drops of blood is all that is needed. Blood samples can be sent back via the post and results will be delivered directly to the user's online account.

## Verax™ DBS Analytics benefits

- Accurate determination of 25-OH-D<sub>3</sub> status of animals from a couple of drops of blood
- Recommendations on target 25-OH-D<sub>3</sub> blood levels to support optimum bone & joint health, immunity, reproduction and muscle deposition
- Expert advice & support from our swine experts to help you achieve your goals
- Easy-to-use, fast process from kit ordering to receiving recommendations via our online application

Order your Verax™ DBS Analytics kit online

Receive the kit via post within 3 working days

Collect the DBS sample and return to the lab via post

DBS samples analysed for 25-OH-D<sub>3</sub>

Receive results & recommendation directly to your online account in 5 – 7 working days
