

# VevoVitall®

## The global benchmark for efficient and sustainable pig production

For more than 20 years, VevoVitall® has been the benchmark for superior performance in fatteners. VevoVitall® improves the feed conversion ratio by up to 3.5%, increasing lean muscle deposition while reducing ammonia emissions by as much as 17%.

A key component of the dsm-firmenich Precision Nutrition concept, VevoVitall® has been proven to support animal welfare by reducing ammonia emissions while at the same time delivering significant sustainability benefits. Add measurable performance gains, and you have a game-changing formula.

Get your pigs into game-changing form with VevoVitall® today!
